PROFESSIONAL SUMMARY

AI Engineer with 2+ years of experience building LLM-powered applications, agentic AI workflows, and production RAG systems. Expertise in Python, LangChain, LangGraph, Google ADK, FastAPI, prompt engineering, hallucination reduction, structured outputs, and vector databases. Proven track record deploying grounded AI agents, omnichannel chatbots, and intelligent automation for enterprise clients. Skilled in ML, deep learning, NLP, computer vision, React, REST APIs, Docker, and cloud AI services (OpenAI, Anthropic, Google Cloud AI, Azure AI).

TECHNICAL SKILLS

AI Agents & Frameworks: LangChain, LangGraph, Google ADK, n8n, Semantic Kernel, Azure AI Foundry, Multi-Agent Orchestration, Tool Calling, Agentic Workflows

LLM & GenAI: Generative AI, LLM Integration, Prompt Engineering, Structured Outputs, Hallucination Reduction, Guardrails, RAG Architecture, Reranking, Chunking Strategies

Vector DB & Search: Pinecone, OpenAI Embeddings, Azure AI Search, pgvector, Hybrid Search (Dense+Sparse), Semantic Chunking

Backend & APIs: FastAPI, REST APIs, Python, PostgreSQL, MongoDB, Docker, SQL, Microservices (familiar), CI/CD (familiar)

ML & Data Science: Machine Learning, Deep Learning, NLP, Computer Vision, TensorFlow, Scikit-learn, OpenCV, Pandas, NumPy, Predictive Analytics

Frontend & Cloud: React, JavaScript, TypeScript, HTML/CSS, OpenAI API, Anthropic API, Google Cloud AI, Azure OpenAI, GitHub Copilot, Git, Docker

Evaluation & Quality: Evaluation Datasets, Quality Scoring, Retrieval Precision Metrics, LLM Output Validation, Prompt A/B Testing

PROFESSIONAL EXPERIENCE

AI/ML Automation Engineer – Intern

KI Automatisieren | Remote, Germany | May 2025 – Nov. 2025

- Engineered 15+ agentic AI applications using LangChain, LangGraph, and Python with REST API and vector database integration for 8 enterprise clients
- Built generative AI workflows integrating OpenAI, Anthropic, and Google APIs — 80% reduction in manual processing, 120+ hours saved monthly per client
- Implemented RAG systems (chunking, embeddings, reranking, guardrails) ensuring grounded, hallucination-free, policy-safe LLM responses in production
- Built evaluation datasets and quality scoring to benchmark LLM outputs; deployed 5 production systems saving clients \$50K+ annually

Freelance AI Engineer

Self-Employed | Remote | Nov. 2024 – Present

- Delivered 30+ LLM, RAG, and agentic AI projects (Python, LangChain, FastAPI, Google ADK, OpenAI/Anthropic APIs) — 5.0/5.0 client rating
- Built omnichannel AI agents (Web, WhatsApp) with structured outputs, tool calling, and guardrails for deterministic answers on orders, policies, and products
- Developed Pinecone RAG pipelines (91% retrieval precision, 23% relevance improvement via hybrid search); NLP chatbots boosting engagement by 35%

KEY PROJECTS

Contextual RAG System | *LangChain, OpenAI Embeddings, Pinecone, FastAPI, Python*

- Full RAG pipeline: 1,000+ doc ingestion, semantic chunking, 50K+ embeddings, hybrid dense+sparse retrieval, citation-backed answers — 91% precision, 23% relevance lift

AI Order Management Agent | *Google ADK, LangChain, GPT-4, PostgreSQL, REST APIs*

- Deterministic order/shipping agent via structured outputs + tool calling; 200+ daily requests, 94% accuracy, 98% notification delivery, 75% faster processing

Jarvis – AI Virtual Assistant | *Python, LangChain, OpenCV, Speech Recognition, React, FastAPI*

- Omnichannel agentic assistant: 92% wake-word accuracy, 98% face auth, 5 LLM APIs (OpenAI, Gemini), React UI — 60% faster command execution

Student Performance Prediction | *Scikit-learn, Random Forest, Pandas, Matplotlib, Python*

- Random Forest on 5,000+ records — 87% accuracy, 0.82 F1; 15+ engineered features; 5-fold cross-validation; Plotly interactive dashboards

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science | Jaypee University of Engineering and Technology | Aug 2022 – May 2026

RAG Agents: Build Apps & GPTs with APIs/MCP, LangChain & n8n | Udemy | 2025

Data Science Bootcamp | Udemy | 2025
